28/06/2023 / 2nd Time

```
int x, y, z;
```
→ Declaration.

```
x = y = z = 20;
```
→ Initialization.

Expression (Combo. of operators, constants, variables, function call).

- Arithmetic → (x + y)
- Logical → (x || y)
- Relational → (x > y)

Statement

1. Expression Statement
2. Compound Statement
3. Selection Statement
4. Iterative "
5. Jump Statement
6. Label "

```
{
    int x = 10, y = 15, z = 20;
    x = x + y;
    y = z - x;
    z = x + y;
}
```
→ Compound Statement
